

KYLE MCLEOD

SENIOR PROJECT MANAGER, HAINLINE

Kyle joined Hainline in July 2019 after nearly 20 years with the Bellevue School District(BSD). Kyle started with BSD in the Information Technology department and moved over to the Capital Projects division as a Capital Projects Manager in 2007. Kyle is proven in his abilities to work with diverse groups on sensitive and polarizing issues, present to elected officials and boards, manage concurrent projects successfully while paying close attention to the unique details and requirements of each one, and deliver sustainably built environments that foster education and learning.

PROFESSIONAL EXPERIENCE

Senior Project Manager
Hainline
2019- Present

As Project Manager, Kyle will assist in design and construction support to owners, end-users, and consultants. He has expertise in design development, construction phase administration and design support, contract management and execution and budget development services across a range of project delivery and compensation methods, with proficiency in digital development tools. He will be an active and engaged team leader through all aspects of building infrastructure development.

Capital Construction
Project Manager
Bellevue School District
2007-2009

Kyle successfully managed Bellevue School District capital construction projects for both modernizations and new construction projects of up to \$76.5 million in total project budget, always focused on aligning school parity with district equity throughout every project. Kyle managed design development, initial budgeting, estimating, space programming, IT infrastructure design, and project scheduling. He also led subcontractor negotiation, contracting and management of multi-disciplined consultant teams including specialized trades such as hazardous material handling and geotechnical. Kyle's responsibilities also included coordination with multiple jurisdictions and utilities and identifying school specific sustainability programs and certifications and ensuring they were successfully executed and maintained.

Systems Support
Technician, Information
Technology
2001-2007

Kyle began his career with Bellevue School District as an intern in the information technology department reporting to the manager of network operations and learning the day-to-day functions of the department. He decided to pursue a Bachelor of Science in Computer Science and attended college full-time in parallel with joining the IT department on a permanent, full-time bases. His responsibilities included structuring cabling project management for District telecommunication projects and working directly with systems administrators and network engineers to support District wide infrastructure. Kyle also developed detailed specifications and provided complete project oversight on Somerset Elementary School, Lake Hills Elementary School, Medina Elementary School, Newport High School, Woodridge Elementary School and Wilburton Instructional Service Center.

Intern, Information
Technology
2000-2001
